

Old Fart Token Fart Paper (White Paper)

By Tatashi Toushe

December 2021

Abstract

The Old Fart token is introduced as a crypto currency to bold the problem of presence of elderly people at the political office. In other words, this token has started a campaign and supports it to avoid sleepy politicians to become a president or a leader. The current token is the first crypto currency coin with social-political goals ever exists in which a politician who is in power is kidded.

Introduction

In all over the world, many sleepy politicians are at the office now, some of them have stuck to the chair so there is no room for stronger ones. A proper example of sleepy old fart leader effect on a country condition is Mr. Erdoğan, the Turkish president, who is driving the country's economy into the hell with a hyperinflation. Another sample would be disastrous decision of President Biden to evacuate Afghanistan in which all the US army and NATO achievements over a 20-years period were wasted and so on. It could be a nice idea that the world needs smart strong leaders.

President Biden reportedly farted at Glasgow's COP26 climate talks on 1st of November 2021! "*It was long and loud and impossible to ignore!*" Camilla Parker, Duchess of Cornwall said. Since that date, many hashtags have been raised over the internet like #RoyalFartJoe and #BidenPoopyPants! This happening made a flash in the mind of the author of this paper to make the first social-political meme coin which kids a politician who is in power now, so suddenly the "Old Fart" token was born!

According to the President Biden's methane gas emission on COP26, the goal of this crypto currency has been defined as starting a campaign on banning the sleepy politicians from the office and supporting smart strong leaders (#MightyLeaders).

The Project

As expressed before, the token is named "Old Fart" and its ticker is named after the President Biden's fart as "FARTY". Total supply is 1,000,000,000,000 FARTYs.

Up to %5 of total supply has been released as presale (ICO) on a third party presale platform and collected liquidity. %75 of the raised liquidity at the ICO stage will be locked at that platform for 2 years and %90 of the total supply has been locked on that third party locker platform for 1 year and unlocked to assure the investors against scamming. Only %5 of total supply will be held by the development team for developing and advertising purposes.

After expiration of the above token lock time, %65 of total supply will be donated to the parties in which smart and strong leaders are supported or directly to the candidates that meet the campaign policies. They may spend the tokens in their probable election campaigns. Also they may help our campaign to improve the world, because of their impact on their own country.

%30 of the total supply is exchangeable on CEX and DEX platforms that all people specially the fans of the mentioned campaign or candidates may trade in these platforms.

Token transfer tax is %5 which is divided into the following sections:

- Automatic liquidity generator fee: %3 which is used to increase the liquidity pool size on the DEX.
- Automatic prize fee: %2, which will be divided to token holders as prize.

Seasonal burning due to market conditions would be applied by the development team after the project website announcement. The token is hosted on the Binance Smart Chain because of its fair transaction fees in order to holders' convenience.

Conclusion

The world with smart strong leaders will be much better place instead of sleepy old fart governors! Today crypto currency is a hot topic over the internet, so starting "#MightyLeaders" campaign with creating a novel crypto currency meme coin as its support, may result in success. The author hopes the project would be successful due to young crypto currency fans.
